DCL Arch Pamph-Poweshiek-History-1.2	File - Poweshiek-History-Criminal Cases-Tibbetts, Mollie	2018 - ? Background: On July 18, 2018, University of Iowa student **Mollie Cecilia Tibbetts (1998 - 2018)** disappeared while jogging near her home in Brooklyn, Iowa. A month later, police identified 24-year-old **Cristhian Bahena Rivera** as a suspect in connection with the disappearance. Rivera led

		<p>police to the body of Tibbetts in a Poweshiek County cornfield on August 21. He was charged with first-degree murder. Rivera was found guilty of first-degree murder and sentenced to life in prison without parole. Rivera's immigration status became a politicized issue after police, the U.S. Citizenship and Immigration Services (USCIS), and U.S. Immigration and Customs Enforcement (ICE) indicated that he had been in the United States illegally. The Trump administration and some Republicans, including Iowa governor Kim Reynolds, used the murder to argue for more restrictive immigration policies. Content: 95 articles covering Mollie Tibbetts' disappearance, the search for her, the murder trial, and the political tension surrounding her death. Keywords: Crime, murder, immigration</p>

DCL Arch Pamph- Poweshiek- History-1.2	File - Poweshiek-History-History of Poweshiek County	<p>Written History of Poweshiek County Poweshiek County was named in honor of Chief Poweshiek, one of the leaders of the Sac and Fox (Mesquakie) Tribe, whose members made their home in the game-rich Skunk River area near present-day Searsboro. (The name Poweshiek means "Roused Bear" or "Shaking Bear".) Following the Black Hawk War in 1832, a series of treaties were negotiated, which compelled the Sac and Fox to sell their lands to the government, thereby opening them to settlement. Following the Treaty of 1842, the remaining tribal lands in Iowa were sold, and the Tribe was forced to move to a reservation in Kansas. In 1850 some of the members of the Sac and Fox Tribe returned to Iowa and in 1856 purchased 80 acres near Tama, where the Sac & Fox Indian Settlement was established. The county was originally part of Keokuk County from 1837 to 1840 and subsequently Iowa and Mahaska Counties. It was formally organized on April 3, 1848, the date on which the first election was conducted, and on June 5, 1848, the elected commissioners selected a site for the county seat of justice, naming it Montezuma. The first courthouse, a frame building, was erected in 1850 on the northeast corner of the present town square. Construction of the present courthouse, the second oldest in Iowa still in use, was begun in 1856. In the 1930s, the building was raised by the WPA (Works Progress Administration) and has since been enlarged. Poweshiek County is roughly square in shape, covering an area of 580 square miles, and is divided into sixteen townships. Of the scattered early settlements, eight cities remain: Brooklyn, Deep River, Grinnell (the largest), Guernsey, Hartwick, Malcom, Montezuma,</p>

		and Searsboro. In addition, portions of the cities of Barnes City and Victor lie in the county. It is predominantly rural in character with a large agricultural base, although there are many other industries in Brooklyn, Grinnell, and Montezuma. The public school system first originated in 1852, and Poweshiek County is presently the control county for three school districts: Brooklyn-Guernsey-Malcom (BGM), Grinnell-Newburg, and Montezuma Community. Grinnell College, a four-year liberal arts institution, is located in Grinnell.

DCL Arch Pamph-Grinnell-Schools (Public)-5.1-5.2-5.2	File - Grinnell-Schools (Public)-History-Parker School	Parker School: In 1896 Parker School was constructed on the corner of Spring Street and Sixth Avenue and named for Professor L.F. Parker, the school district's

		<p>first superintendent (1856-1860) and author of the two-volume History of Poweshiek County on which we all rely. (An Oberlin graduate, he taught, by himself, all classes from Primary through High School during the first year.) Parker School replaced the Northwest School, which had been built at the same location in 1882 and was destroyed by fire. As the years progressed, the facility became outdated and failed to meet recommended standards. Parker's site area was only 1.2 acres and, with an enrollment of 149 students in 1961-62, fell far short of the optimum site area of 6.5 acres. When constructed, it was located on the outskirts of town, but the growth of residential areas to the west caused its location to become outmoded, and the fact that it was situated on Highway 6 created safety issues. In 1970 the School Board decided to demolish the building at the end of the current school year. The building and land were sold at public auction for \$24,000 (GHR 3/19/1971), and the building was razed on August 19, 1971.</p>
